

## Technology for Education Development Interns

Project Title	Technology for Education Development Interns
Project Summary	You will work closely with USAID's Education Technology Specialist and other subject matter experts to support an ambitious global program focused on effective uses of technologies to positively impact educational outcomes principally in low-resource, developing country context.
Country	United States

## Project Description

As VSFS interns, you will provide research, writing, and event support among other activities focused on the use of information and communications technology for education (ICT4E) in developing countries. We will jointly identify topic areas of interest (e.g., subject matter instruction, teacher professional development, education in crisis and conflict settings, assistive technologies) which you will follow, synthesize key activities and good practices, and periodically write-up for relevant Agency knowledge products. You'll also be part of the support team for the Mobiles for Education Alliance Symposium held in October 2019 in Washington, D.C. This is an annual event organized by a consortia of donor agencies and private sector organizations which brings together policymakers and practitioners from around the world. This year's theme is on Digital Literacy and Skills for Education and Development. It will be an amazing year for deepening USAID's contributions to the global ICT4E agenda and you can be part of this!

## Required Skills or Interests

### Skill(s)

Analytical writing

Design thinking

Editing and proofreading

Graphic design

Research

Storytelling/blogging/vlogging

Writing

## Additional Information

You'll be working with a team of other VSFSers to support a general range of ICT4E knowledge products and activities. We'll co-identify specific ICT4E subject areas and then which you'll be responsible for following and developing periodic written and digital products. You will also be engaged in supporting the mEducation Alliance, a consortia of donor and other leading stakeholder agencies, with common interest in technology for education in developing countries. Among other activities, the Alliance convenes an annual Symposium in Washington, D.C.
